Release History

- Initial Release 1.0 - 3rd Nov 2020

About Dot Net Tricks

Dot Net Tricks was founded by Shailendra Chauhan (Microsoft MVP), in Jan 2010. Dot Net Tricks came into existence in the form of a blog post over various technologies including .NET, C#, SQL Server, ASP.NET, ASP.NET MVC, JavaScript, Angular, Node.js and Visual Studio, etc.

The company which is currently registered by a name of Dot Net Tricks Innovation Pvt. Ltd. came into the shape in 2015. Dot Net Tricks website has an average footfall on the tune of 300k+ per month. The site has become a cornerstone when it comes to getting skilled-up on .NET technologies and we want to gain the same level of trust in other technologies. This is what we are striving for.

We have a very large number of trainees who have received training from our platforms and immediately got placement in some of the reputed firms testifying our claims of providing quality training. The website offers you a variety of free study material in the form of articles.

Dot Net Tricks Courses

Master in-demand job skills with our step by step and project-based courses. Learn to start a new career, with our curated learning paths tailored to today's developers and technology needs. Learn to code, prepare yourself for interviews, and get hired!

We offer the courses in the following categories:

- .NET Development
- Front-end Development
- Cloud
- DevOps
- Programming Languages
- Database - SQL and NoSQL
- Mobile Development
- ML/AI and many more...

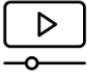

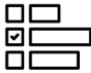

You can start learning free from here: <https://www.dotnettricks.com/courses>

Dot Net Tricks Plus

DotNetTricks Plus unlocks the access of DotNetTricks premium features like unlimited access to all courses, source codes, and assessments. Get help over email or phone. Upgrade your skills with curated learning paths tailored to today's developers and technology needs. Learn new skills and discover the world of possibilities with step-by-step guidance.

Dot Net Tricks Plus Features

Each Plus member will get access to our full-featured learning platform with advanced tools, which is required to learn new skills and advance his/her career.

 Video Lessons In-depth video lessons enhanced by interactive diagrams and best practices.	 Interactive Lessons Learn and recall the concepts through our interactive code based articles i.e. lessons.	 Integrated Online IDE Practice everything using our online editor, run your code and get the output in browser.	 Real Hands-On Labs Learn coding by doing in our live integrated code sandbox environment in browser.
 Study Mode Quizzes Check your learning progress through quizzes and evaluate what you've learned.	 Learning Checks Track your learning progress by finding out what lessons you've completed and what left to learn.	 Lessons Bookmark Bookmark your important lessons to focus on your important learning.	 Develop Real Projects Learn to build real projects with industry recommended principles and practices.
 Certificate of Completion Earn certificates as a proof of your hard-earned skill and knowledge.	 Resume Review Increase your selection chance by 2x. Our team will help you to make your resume.	 Career Guidance Get career guidance through our expert mentors to shine your career.	 Mock Interview Schedule a virtual face to face interview with leading industry expert and get expert feedback.
 Job Assistance Our recruitment team offers complete assistance to get your dream job and desired role.	 Learning Support Get learning assistance through email or phone. Our support team will help you in learning.	 Access to Forum Enrich your learning through peer interaction and knowledge sharing using our support forum.	 Web and Mobile Upgrade yourself with latest technologies from anywhere, any time and using any device.

Start your journey today to learn coding. Because learning to code is the first step and forward to advance your career.

The detail about DotNetTricks Plus can be found here: <https://www.dotnettricks.com/plus-membership>

Corporate Training

Dot Net Tricks having a pool of mentors who help the corporate to enhance their employment skills as per changing the technology landscape. Dot Net Tricks offers customized training programs for new hires and experienced employees through online and classroom mode. As a trusted and resourceful training partner, Dot Net Tricks helps the corporate to achieve success with its industry-leading instructional design and customer training initiatives.

Apart from these, we also provide on-demand boot camps and personalized project consultation.

The detail about Corporate Training can be found here: <https://www.dotnettricks.com/corporate-training>

Dot Net Tricks Unlimited Live Training

Instructor-led Live Online Training Programs

DotNetTricks unlimited membership unlock unlimited access to all courses, learning paths, study mode quizzes, hands-on labs, source code and study material. Upgrade your skills with our structured learning paths tailored to today's developers and technology needs. DotNetTricks Unlimited Live training membership includes the **benefits of DotNetTricks Plus** membership and **Unlimited live online training**.

DotNetTricks Unlimited Live Training enables you to Become:

- **Full-stack JavaScript Developer** - Angular, ReactJS, Node.js
- **Full-stack .NET Developer** - .NET, ASP.NET Core, MVC5, WebAPI
- **Technical Architect** - Microservices, Design Patterns and Clean Architecture
- **Cloud Engineer/Architect** - Microsoft Azure, AWS
- **DevOps Engineer** - DevOps, Docker and Kubernetes
- **Mobile Developer** - Xamarin Forms, React Native

The detail about Unlimited Live Training can be found here: <https://www.dotnettricks.com/instructor-led-courses>

Dot Net Tricks eBooks

Dot Net Tricks offer a wide range of eBooks on technical interviews Q&A. All eBooks are written by industry experts and coaches. These eBooks will help you to prepare yourself for your next job within a short time. We offer the eBooks in the following categories:

- .NET Development
- Front-end Development
- Cloud
- DevOps
- Programming Languages
- Database - SQL and NoSQL
- Mobile Development
- ML/AI and many more...

You can buy other eBooks from here: <https://www.dotnettricks.com/books>

Join us today, learn to code, prepare yourself for interviews, and get hired!

Dedication

I would like to say many thanks to my father who gave me the opportunity to make my carries as I wanted when I was in 10th standard. I gave the speech about “Beti bachao” and I got national awards for the first time. I have lots of expertise on DevOps and one day Ankur Mistry saw my technical knowledge and he inspired me to write a book and share the knowledge to others. The Next day I started the book and also, I believe reading and writing is the most important part of gaining knowledge in life.

I would like to say thanks to my father and mother for teaching me nothing is impossible and be the best version of yourself.

Also, thanks to my heroes(brothers) Vipul and Pankaj, who always remind me who I am and what I can do, always support me no matter what situation.

Special thanks to Ankur Mistry who is my inspiration.

To my wonderful readers, may you find this book helpful?

“Keep your mind open to change all the time. Welcome it. Always go with the choice that scares you the most, because that’s the one that is going to help you grow”

With lots of love.

-Dharti Sutariya

Introduction

What Where Author Qualification to Write This Book

Dharti Sutariya is DevOps Engineer. She has more than 3 years of experience on DevOps technologies such as Explicit Technical Knowledge and hands-on experience of DevOps processes and practices, Automation, Auto scaling, Monitoring, and Configuration Management. Gained expertise in SDLC and Agile implementation. Experienced in maintaining the Continuous flow from Code phase to Deployment and Production Phase. Experienced DevOps Model, CI/CD with Jenkins and Azure DevOps 2019 server.

What This Book Is

Kubernetes, a powerful tool in DevOps field, was originally designed by Google and is now maintained by the Cloud Native Computing Foundation. Automates the application deployments, scaling the cluster and container, scheduling, maintenance, and operation of multiple application containers across clusters of nodes.

What You'll Learn

This book is for the techy, Freshers and Experienced DevOps Engineers who are looking for a change or want to make a bright future in DevOps. This book covers the interview questions on the following topics:

- Container Orchestration
- Fundamentals of Kubernetes
- Minikube
- Kubernetes Architecture
- Kubernetes Object and Workload
- Kubernetes Master Components
- Kubernetes Node Components
- Kubernetes Installation
- Kubernetes Commands
- Kubernetes Service
- Kubernetes Pods
- Kubernetes Deployments
- Kubernetes Networking

Our best wishes are always with you for your learning and growth!

About the Author

Dharti Sutariya - DevOps Engineer and Author

She achieved great technical knowledge in a short period of time in DevOps Technology, she has vast experience in DevOps area. She graduated from Gujarat Technology University (GTU)- India. She has an ability to set up a fully DevOps oriented process.

She is working as a DevOps Engineer in an MNC with her major interest in technologies and frameworks like Docker, Kubernetes, Terraform, Ansible, Chef and many more using platform Linux and Windows.

She has explicit Technical Knowledge and hands-on experience of DevOps processes and practices, Automation, Auto scaling, Monitoring, and Configuration Management. Gained expertise in SDLC and Agile implementation. Experienced in maintaining the Continuous flow from Code phase to Deployment and Production Phase. Experienced DevOps Model, CI/CD with Jenkins and Azure DevOps 2019 server.

How to Contact Us

Although the author of this book has tried to make this book as accurate as it possible but if there is something strikes you as odd, or you find an error in the book please drop a line via e-mail.

The e-mail addresses are listed as follows:

- mentor@dotnettricks.com
- info@dotnettricks.com

We are always happy to hear from our readers. Please provide your valuable feedback and comments!

You can follow us on [YouTube](#), [Facebook](#), [Twitter](#), [LinkedIn](#) and [Google Plus](#) or subscribe to [RSS feed](#).

How to Contact Us	9
Container Orchestration	19
Q1. What is a Container?	19
Q2. Why do we need containers?	19
Q3. What is the difference between containers and virtual machines?	19
Q4. Which types of platforms are supported by containers?	20
Q5. What are the benefits of containers?	20
Q6. Are there any disadvantages or Limitation of containers?	20
Q7. What is the difference between deploying applications on hosts and containers?	21
Q8. What is Container Orchestration?	21
Q9. What is container orchestration used for?	21
Q10. Mention the various container resource monitoring tools?	21
Q11. What are various Container orchestration tools?	22
Fundamentals of Kubernetes	23
Q1. What is Kubernetes?	23
Q2. Why use Kubernetes?	23
Q3. What are the benefits of Kubernetes?	23
Q4. What are different types of objects available in Kubernetes?	24
Q5. What are Kubernetes alternatives?	24
Q6. What is the difference between Kubernetes and docker swarm?	24

Q7.	Can we use Kubernetes as an alternative to docker?	25
Q8.	Can we install Kubernetes on the Windows platform?	25
Q9.	Can we autoscale windows containers using Kubernetes?	26
Q10.	Which platform is supported by kubernetes-master?	26
Q11.	Which windows worker node is supported by Kubernetes?	26
Q12.	Is there any limitation of Kubernetes?	26
Q13.	Is Kubernetes secure?	27
Q14.	How can we protect Kubernetes?	27
Q15.	Does Kubernetes do load balancing?	27
Q16.	What are the disadvantages of Kubernetes?	27
Q17.	Which programming language is Kubernetes written in?	27
Q18.	Can Kubernetes work without Docker?	27
Minikube		28
Q1.	What is Minikube?	28
Q2.	Do you explain the features of minikube?	28
Q3.	What is the use of Minikube?	28
Q4.	What are the disadvantages of Minikube?	29
Q5.	What are the advantages of Minikube?	29
Q6.	What is the difference between Kubernetes and minikube?	29
Q7.	Can you use Minikube in production?	29
Q8.	Does Minikube require Docker?	30
Q9.	What command-line interface is used to interact with the Kubernetes cluster?	30
Q10.	How do I Install Minikube on Windows?	30
Q11.	How do I install Minikube on Mac?	31
Q12.	How do I install Minikube on Linux?	32
Q13.	How do I install a Helm in Minikube?	32
Q14.	How do I get rid of Minikube for windows?	33
Q15.	How do I get rid of Minikube for ubuntu?	33
Q16.	What is Minikube, Kubectl and kubelet?	33
Q17.	Does Minikube support Load Balancer?	33
Q18.	How do I start Minikube in Ubuntu?	33
Q19.	How do you make a pod on Minikube?	34
Q20.	Where is the minikube config file location?	35

Q21.	How to start minikube on a specific network?	35
Q22.	How to create a deployment in minikube?	35
Q23.	Is the minikube support dashboard?	35
Q24.	What does Kubectl stand for?	36
Q25.	Is Docker Desktop support Kubernetes?	36
Q26.	Can we use the dashboard feature in Docker Desktop?	37
Q27.	How can we apply Minikube in Docker Desktop?	38
Kubernetes Architecture		39
Q1.	Do explain Kubernetes Architecture?	39
Q2.	How does Kubernetes work?	40
Q3.	How does the CI/CD pipeline work with Kubernetes?	40
Q4.	How does Kubernetes Autoscaling work?	40
Q5.	Explain Kubernetes Deployment strategies.	41
Q6.	What is Etcd?	41
Q7.	What is a Master?	41
Q8.	What is a Worker node?	41
Q9.	What are the different objects in Kubernetes?	41
Q10.	Explain the Load balancer in Kubernetes?	42
Q11.	What is Ingress in Kubernetes?	42
Q12.	What is NodePort?	43
Q13.	What is the Cluster IP?	43
Q14.	Why do we need Kubernetes High Availability (HA)?	44
Q15.	Is Kubernetes a container runtime?	44
Kubernetes Object & Workload		45
Q1.	What is Namespace?	45
Q2.	What are the different services within Kubernetes?	45
Q3.	What are the built-in namespaces available in Kubernetes?	45
Q4.	Explain Daemon sets?	46
Q5.	Explain Replica set?	46
Q6.	What is Heapster?	46
Q7.	Explain Replication controllers?	46
Q8.	What are the types of controller managers?	46
Q9.	What are Kubernetes labels?	46

Q10.	Why does the kubelet manage the hosts file?	46
Q11.	How can we get a static IP for a Kubernetes load balancer?	46
Kubernetes Master Components		47
Q1.	Which component can manage a Kubernetes cluster?	47
Q2.	What are the main components of the master node?	47
Q3.	What process runs on Kubernetes Master Node?	47
Q4.	What is the API in Kubernetes?	48
Q5.	How do I connect to Kubernetes API?	48
Q6.	How do I run Kube API Server?	48
Q7.	Where are the stored Credentials of the API server?	48
Q8.	What is Kubernetes scheduler?	48
Q9.	How does the Kubernetes scheduler work?	48
Q10.	Can we implement a custom scheduler in Kubernetes?	48
Q11.	What are the feasible nodes?	48
Q12.	How does the kube scheduler do the selection of nodes?	48
Q13.	How can we check the kube scheduler log in master node?	48
Q14.	What is a kube-controller manager?	49
Q15.	What is Etcd?	49
Q16.	What is cloud-controller?	49
Q17.	What is the job of the kube-scheduler?	49
Q18.	What happens if Kubernetes master goes down?	49
Kubernetes Node Components		50
Q1.	What is a node in Kubernetes?	50
Q2.	Explain Kubernetes node components?	50
Q3.	What is kubelet?	51
Q4.	What is the kube-proxy in Kubernetes?	51
Q5.	What task is Kube Proxy responsible for?	51
Q6.	What is Container Runtime Interface (CRI)?	51
Q7.	How does DNS work in Kubernetes?	51
Q8.	What are the major functions of Kubelet as a node service component in Kubernetes?	51
Q9.	What things do we need to take care before joining the node in k8s cluster?	51
Q10.	How can we join Kubernetes nodes to existing clusters?	52
Q11.	What does the node status Hold?	53

Kubernetes Installation	54
Q1. How do you Verify if Kubernetes is installed?	54
Q2. Is Kubernetes free?	54
Q3. What are the Prerequisites for Kubernetes?	54
Q4. Which ports need to open to create a k8s cluster?	55
Q5. How to check the MAC address and product_uuid are unique for every node?	55
Q6. How can we assure that iptable can see bridge traffic?	55
Q7. Why do we need Check network adapters when we are going to install k8s?	56
Q8. What is used by Kubernetes to run containers inside the pod?	56
Q9. How to install Kubernetes in Linux?	56
Q10. How to install kubectl in windows?	59
Q11. How to install kubelet on MacOS?	59
Q12. How to check if a Kubernetes cluster is running or not?	59
Q13. How to update Kubernetes cluster?	60
Q14. How to Restart the kubelet?	60
Kubernetes Commands	61
Q1. How to List pods with nodes info?	61
Q2. What is the command for List everything in Kubernetes cluster?	61
Q3. How can we Get all the services?	61
Q4. What is the command for Get all deployments?	61
Q5. How can we Show nodes with labels?	61
Q6. Can you tell the commands for Get resources with json output?	61
Q7. How to Validate a yaml file with dry run?	61
Q8. How to Get system config via configmap?	61
Q9. What is the command for Watching pods?	61
Q10. What is the Query health check endpoint?	61
Q11. How can we Open a bash terminal in a pod?	62
Q12. How can we check the environment variable of the pod?	62
Q13. How can we use the “kubectl apply command” on the folder where our yml file is located?	62
Q14. How can we Get services sorted by name?	62
Q15. How can we Get pods sorted by restart count?	62
Q16. How can we get a list of pods and images?	62
Q17. How can we list out all container images?	62

Q18.	How can we Get node resource usage?	62
Q19.	How can we Get pod resource usage?	62
Q20.	How to List resource utilization for all containers?	62
Q21.	What is the command for Delete pod?	62
Q22.	What is the command for Delete pod by force?	63
Q23.	How can we Delete pods by labels?	63
Q24.	How can we Delete all resources filtered by labels?	63
Q25.	How can we Delete persistent volumes by labels?	63
Q26.	What is the command for List all critical pods?	63
Q27.	How can we List Out pods with more info?	63
Q28.	How can we get pod info?	63
Q29.	How can we List all pods with labels?	63
Q30.	How can we List all unhealthy pods?	63
Q31.	How can we list out only running pods?	63
Q32.	How can we Filter pods by label?	63
Q33.	How can we Manually add labels to a pod?	63
Q34.	What is the command for removing labels of pods?	63
Q35.	How can we List secrets in Kubernetes?	64
Q36.	How can we Generate secret?	64
Q37.	How can we Get secret?	64
Q38.	How can we List all Secrets currently in use by a pod?	64
Q39.	How can we Get a specific field of a secret?	64
Q40.	How can we List storage class?	64
Q41.	How can we Check the mounted volumes?	64
Q42.	How can we Check persistent volume?	64
Q43.	How can we Copy local file to the pod?	64
Q44.	How can we Copy pod file to local?	64
Q45.	How can we View all events?	64
Q46.	How can we List Events sorted by timestamp?	64
Q47.	How can we Mark node as unschedulable?	64
Q48.	How can we Mark node as schedulable?	65
Q49.	How can we Drain node in preparation for maintenance?	65
Kubernetes Services		66

Q1.	What is the Kubernetes service?	66
Q2.	How does Kubernetes service work?	66
Q3.	What is the difference between deployment and service Kubernetes?	66
Q4.	How do services connect to the deployment?	67
Q5.	What are the different types of services in Kubernetes?	67
Q6.	How to Identify a Kubernetes service?	68
Q7.	How do I access Kubernetes service?	68
Q8.	What is the Kubernetes headless service?	68
Q9.	What is the default protocol for a Service?	68
Q10.	What is the command for Listing all Kubernetes services?	68
Q11.	What is the command for listing service endpoints?	68
Q12.	How can we Get service details?	68
Q13.	How can we Get service cluster IP?	68
Q14.	How can we get service cluster port?	68
Q15.	How can we Expose service as load balancer service?	68
Kubernetes Pods		69
Q1.	What is a pod and why are pods so important?	69
Q2.	Does kubelet create pods?	69
Q3.	How to check if a pod is running from the dashboard?	69
Q4.	How do I start a pod in Kubernetes?	70
Q5.	Do explain pod lifecycle?	70
Q6.	When and how pods will be created?	71
Q7.	Why do we need pods in Kubernetes?	71
Q8.	How do you get pods in a pod?	71
Q9.	How do I delete the POD forcefully in Kubernetes?	71
Q10.	How do containers within a pod communicate?	71
Q11.	How do I access Kubernetes pod from outside?	71
Q12.	Can pods in different namespaces communicate?	71
Q13.	What do containers share inside a pod?	71
Q14.	What are the different types of multiple-container pods?	72
Q15.	How do I delete all pods in Kubernetes?	72
Q16.	Can we recover pods after deletion?	72
Q17.	Can we run windows and Linux containers in the same pod?	72

Q18.	How do I update all my pods if the image changed but the tag is the same?	72
Q19.	What is the difference between the pod and the container?	72
Q20.	How to configure Vertical pod autoscaler?	72
Q21.	How to configure Horizontal pod autoscaler?	73
Q22.	How many pods can run on a node?	73
Kubernetes Deployments		74
Q1.	What are Kubernetes Deployments?	74
Q2.	What are Kubernetes manifests?	74
Q3.	How can we check if Deployment is created or not?	74
Q4.	How do I rollback the Deployment?	74
Q5.	How to determine the status of deployment?	75
Q6.	How can we see ReplicaSet which is created by deployment?	75
Q7.	How can we get details of the deployment?	75
Q8.	How can we Delete deployments by labels?	75
Q9.	How to Pause/Resume deployments?	75
Q10.	How to Check update history of deployment?	75
Q11.	How to Check the update status of Deployments?	75
Q12.	How to scale-out deployment?	75
Q13.	How to Rollback Deployment to the previous version?	75
Q14.	How can we Expose deployment as a load balancer service?	75
Kubernetes Networking		76
Q1.	What is Kubernetes networking?	76
Q2.	What are the different types of Kubernetes networking?	76
Q3.	How does the Kubernetes Network work?	76
Q4.	What are the Kubernetes Networking Conditions?	76
Q5.	Why do we need network policy in Kubernetes?	76
Q6.	How to apply network policy on pod?	76
Q7.	How Does Kubernetes Networking Compare to Docker Networking?	77
Q8.	What is cbr0 in Kubernetes?	77
Q9.	What is Container to Container network?	78
Q10.	What is pod to pod network?	78
Q11.	What is pod to service network?	78
Q12.	Explain the Internet to Cluster Networking	79

Q13. What is Ingress?	79
Q14. What is Egress?	79
Q15. What is CNI (container network interface)?	80
Q16. How many Kubernetes Network drives are supported in windows?	80
Q17. What are the different types of CNI?	80
Q18. How do I check my network for Kubernetes?	80
Q19. What is a flannel network in Kubernetes?	80
References	81
